

S.J. PHILLIPS

Early 20th century emerald and diamond cluster ring, c.1905, centred by an cut-corner rectangular emerald of approximately 1.20ct,

with a round brilliant cut diamond above and below, between flaring leafy sides set with single and rose cut diamonds and tapering to the shank, all millegrain set, the brilliants of old and transition cut, mounted in platinum, in our opinion the emerald is of Colombian origin with moderate traditional oil clarity treatment

Cluster 16 x 14mm

Emerald approximately 7.20 x 5.70 x 3.65mm

Weight: 3.5g
